

# RSFH Pharmacy Benefits Formulary

Effective July 2023

## HOW TO USE THIS FORMULARY DOCUMENT

This document is a list of approved prescription medications covered under Roper St. Francis Healthcare's Pharmacy Plan. All drugs are listed by their generic names and the most common proprietary (brand) name. The Formulary may be accessed by using the index, either by the generic name (in italics) or the proprietary name (in capital letters) or by the therapeutic drug category. The drugs in this formulary are grouped into categories depending on the type of medical conditions that they are used to treat. Look under the category name in alphabetical order by generic name for your drug. This document does not apply to medications used in the doctor's office or in the hospital.

## Tier Benefit Design

The Formulary may be applied to a tier benefit design, where the member shares the cost of prescription drug therapy based on the drug's tier and copayment or coinsurance. In most instances, generically available drugs will be covered in a separate lower tier (lowest copay), preferred branded drugs listed on the Formulary will be covered under a higher tier, and non-preferred branded drugs will be covered under a separate non-preferred branded drug copay tier. Specialty drugs will be covered under the highest tier (highest copay). Essential health benefit/preventative medications, if available on the formulary (applies to new and non-grandfathered plans), will be covered without cost sharing (zero copay).

For all drugs within the Drug Formulary table, the tier level is denoted throughout the document using the following symbols (refer to below).

## TIER DEFINITIONS:

**TIER 1:** Preferred generic medications

**TIER 2:** Non-preferred generic medications

**TIER 3:** Preferred brand medications

**TIER 4:** Non-preferred brand medications

**TIER 5:** Preferred specialty medications

**TIER 6:** Non-preferred specialty medications

For certain agents within the Formulary, a recommended prescribing guideline may apply. These are denoted throughout the document using the following symbols:

Symbol	Guideline	Description
AGE	Age Edit	Coverage may depend on patient age
PA	Prior Authorization	Requires specific physician request process
QL	Quantity Limit	Coverage may be limited to specific quantities per prescription and/or time period. Prior authorization is required for quantities exceeding the restriction.
ST	Step Therapy	Coverage may depend on previous use of another drug
MM	Maintenance Medication	Maintenance medicines are taken long-term, including, but not limited to, medicines you take for high cholesterol, mental health, or high blood pressure. If your plan is subject to the fill rules, you will be required to fill your prescription refills using Harness Health Pharmacy for Home Delivery. Some maintenance medications are considered "exempt" from the first fill rule. For a list of these medications, please review the "Two Fill Exception List."

## Benefit Coverage and Limitations

This printed Formulary does not provide information regarding the specific coverage and limitations to which an individual member may be subject. Many members have specific benefit inclusions, exclusions, copays, or a lack of coverage, which are not reflected in the Formulary.

The Formulary applies only to outpatient drugs provided to members and does not apply to medications used in inpatient settings. If a member has

any specific questions regarding their coverage, they should contact the phone number on the back of their prescription card (888-783-1780).

**Depending upon a member's specific benefit parameters, the following topics may apply:**

### **Generic Substitution**

When available, FDA approved generic drugs are to be used in all situations, regardless of the brand name indicated. The generic names are in italics in the formulary listing wherever an FDA approved generic drug product is available. All drugs that are or become available generically are subject to review by RSFH and the Pharmacy & Therapeutics (P&T) and Formulary Committees. P&T meets quarterly and more often as warranted to ensure clinical relevancy of the Formulary.

If a member requests a brand name product in lieu of an approved generic, the member, based upon their coverage, will typically be required to pay the difference in cost between the brand and the generic. If a physician determines that there is a documented medical need for the brand equivalent, a request for coverage may be made using the medication request process.

### **Medication Request Process**

MedImpact is the Pharmacy Benefit Manager and is responsible for processing pharmacy claims for Pharmacy Plan members.

MedImpact also handles medication requests for the Pharmacy Plan as follows:

### **Coverage Exceptions**

Drugs that are listed in the Formulary with associated Prior Authorization (PA) require evaluation, per the P&T Committee Prior Authorization guidelines prior to dispensing at a network pharmacy. Each request will be reviewed on an individual patient need basis. If the request does not meet the guidelines established by the P&T Committee, the request will not be approved, and alternative therapy may be recommended.

If the request does not meet the guidelines established by the P&T Committee, the request will not be approved, and alternative therapy may be recommended.

### **Obtaining Coverage**

Coverage, questions or information regarding the medication request or formulary process may be obtained by:

1. Obtaining a **Medication Request Form** from MedImpact and faxing a completed form to MedImpact, at (858) 790-7100.
2. Contacting MedImpact at (800) 788-2949 and providing all necessary information requested.

MedImpact will provide an authorization number, specific for the medical need, for all approved requests. Non-approved requests may be appealed. The prescriber must provide information to support the appeal on the basis of medical necessity. Prior Authorization is generally not available for drugs that are specifically excluded by benefit design.

### **General Exclusions**

- Medications for the treatment of sexual dysfunction
- Medications for the treatment of fertility
- Over the Counter (OTC) medications or their equivalents
- Nutritional and dietary supplements
- Drugs specifically listed as not covered.
- Any drug products used for cosmetic purposes.
- Experimental drug products or any drug product used in an experimental manner.
- Non-self-administered injectable drug products unless otherwise specified in the Formulary listing.
- Foreign sourced drugs or drugs not approved by the United States Food & Drug Administration, except in certain cases of drug shortage, when allowed under the individual's pharmacy benefit.
